Professional Summary

A dedicated Full-Stack Developer with hands-on experience building dynamic web and mobile applications using Laravel, Flutter, and Nuxt.js. Proven track record in public sector compliance systems and enterprise application development with a strong focus on data management, backend security, and database optimization. Passionate about collaborating with forward-thinking engineering teams to solve complex real-world technical challenges.

Skills

- **Programming Languages:** PHP, Dart, JavaScript, C++, C#, Python, SQL, HTML/CSS
- **Frameworks:** Laravel, Flutter, Nuxt.js
- **Databases:** Firebase, MySQL
- **Tools and Tech:** Git, Github, RESTful APIs, Postman

Relevant Experience

Back-end Developer - EBOS Cloud Accountants

October 2025 - Present

- Developed and maintained features for an existing internal Small-Medium Enterprise (SMEs) using Laravel, with a close collaborative team to develop fast and quality deliverables.
- Optimized system performance by continuously diagnosing and patching recurring technical errors, improving overall system stability.
- Integrated a text-generative AI as a tool for a templating module.
- Proactively scanned codebase and system architecture for security flaws, implementing patches to prevent data breaches and unauthorized access.
- Upgraded core system architecture to the latest version, refactoring legacy codebase to eliminate deprecated functions and optimize performance.

Full-stack Developer Intern - City Information Technology Center

February 2024 - July 2024

- Developed a Vices Regulation Information System for a government entity using Laravel and Nuxt.js, digitizing regulatory tracking and enhancing public sector compliance.
- Collaborated with a cross-functional team to assist with system deployments and cross-collaborated on external codebases to expedite team milestones.
